Hexvade is a game that actually interested me since I heard it was being developed by Andy Mark who's friends with a few people that I close to, so I figured I'd try to give it a shot eventually. I gave it about 2 hours to take a look into it, see it's pros and cons, and weather I find this game good. (This is all based on experience with Single Player.)

Firstly I must say the simple graphic design is sorta of a vein to something like classic or retro games of the Mid 80's, and to boot the difficulty I must say is actually really challenging (Like if you aren't prepared to be challenged by a game, this game will crush you almost immediately.) This game will be brutal, though there are problems with that. Some of the bosses are much easier than others. The Lizard per example is much harder to beat than The Ninja the first time around. Vice versa and you can switch them around, but recommended to take down the easier bosses first. Some Items in this game you can pick up are better than others obviously, though that's sometimes different in certain situations which I like. Some of the Boss patterns can be tricky and some can be easy. A lot can be going on at times which is hard to sort of grasp but it's not super unfair, though at times it can be.

The game as I said had a graphic design that was simple though it quite looks nice and appreciate the artistry, the boss designs are quite nice and have a lot of charm. Same with the HexMAN which is easily the best character (Totally.) There is a lot to love with it, and to go along with it the soundtrack is quite a gem. Really if you haven't, do yourself a favor and check out Loeder on Youtube and listen to his music. He's one of a kind. The presentation is easy to understand and you have to memorize very few things during playing the game which is good since it keeps things much less complicated than they need to be.

There are a few things that kinda happen that distract the gameplay like colission detection sometimes seems to be finicy, especially in the Hex Block that drop as you can phase right through them, Some of the times when you collect an item you don't get it sometimes which makes no sense but it happened to me on a few occassions. Sometimes the hitbox sort of lags behind and when I hit the head of a character that can be hit there the hitbox of something (Say the tail) is still there and I take damage for it instead.

On one last note, this game I feel is a good game, not great though it has a lot of potential. I quite enjoyed the 2 hours I spent with it and yes I know I haven't played Multplayer but as a Single Player game it's quite enjoyable and I recommend people who are fans of challenging platformers and Boss Rush types of games. It's well worth the money asked.. Extremely fun! I love the feature of being able to design your own units. Although this game does get boring eventually, it is still worth buying and you will thoroughly enjoy it!

Also, try not to grind easy levels too much- it can ruin the fun!

. I have never seen such a simple game not include a much simpler idea of a ♥♥♥♥ing exit button? seriously? you couldn't take 5 seconds to add a ♥♥♥♥ing exit text to cancel the process? stupidity at its best.. La Péri is a beautifully done (and beautiful) experience for the Vive which, although brief, is a pleasure to explore. The sense of presence in the environment is remarkable, and I've found myself returning to it simply for the enoyment of playing through the story again. It's also a must to introduce non-gamers to the Vive.. The game is really fun and the combat is not boring. The art style of the game is unique and makes the experience of playing through it even better. The story of the game is interesting and keeps you wanting to play to the end.

Awesome game to play with friends just not recommended for anyone playing on a laptop get a desktop to play your game will play much smoother.. asset flip..seen proof from another review from Zaxtor99 ('YT'). I thank him for the info. Link in case you missed it. <https://www.assetstore.unity3d.com/en/?stay#!content/107757>

The dev didn't bother perfecting it either. The first time i played, there is a storyline..the end of it a guy is laughing and this carries on into the game..was annoying. I had to restart the game and it stopped, thank goodness. The controls..you try to move the paddle a little and it moves a lot. I wouldn't recommend this game and I won't be buying 3 which is coming out on the 22. This dev really wants to have a quick cash grab. Do not buy.. good vertical shooter, but... conquered in 1 hour? hahahaha would be better if i could use the mouse and or customizable keys. got it for 50 cents. can recommend for that price.. I have to recommend voice warrior. I have the word "load" set to R, so in any FPS game I play I can reload with my voice. Epic!!!. What is this game?

Short answer: Fantasy Advance War.

You have three very distinct factions: Humans, which mostly operate on combos and simply strong units, elves, which specialise on mobility and guerilla tactics and the undead, which have a lot of regeneration abilities.

You only control nameless mooks in battle, there are no heroes like in fire emblem. It really is more like Advance War in that way. But every faction has a number of different generals (two to three per faction I believe) who each have a passive and two active effects. The passive ones are things like taking over cities immediately or all units having more health while the active ones range from healing to having everyone who is in a forest act again. Active abilities are powered by mana, which you get for combo kills.

What are combos? Attacking an enemy will place a combo marker on that unit. If you attack that unit again with another unit without doing anything else in between (moving and attacking with one unit counts as one action and does not break combo) will deal increased damage and reduce the damage of the counter. This stacks up to three times. Killing a unit with combo markers on them will generate mana equal to the amount of markers on that unit.

The campaign is good. It doesn't have a deep story with any notable twists (so far) but it is written in a humorous way. Don't take it seriously, it doesn't take itself seriously too. And best of all: Everything is deterministic and you can undo each of your actions however often you want during a turn, so even if you misclick you can undo and do better till you have found the best combo. So battles are decided by long term strategy, not by who can calculate the best and does the least misclicking during short term skirmishes.. URO is a great little rhythm game, as long as you keep it on easy. If you go further than that it becomes convoluted and hard to play. Now this game has performance issues that clear up if you run it at the lowest resolution in full screen. Doesn't really effect gameplay and I barely noticed it's smudginess and actually felt like it added charm. It starts off really simple but by the end on Easy I was failing some challenges. I would recommend if you're looking for something more casual while supporting a publisher that seems to be bringing some really niche interesting titles to the west.

.No game. No fun. Just scam.
